

Millstone Japanese Pagoda Tree Sophora japonica 'Halka'

Height: 45 feet Spread: 35 feet Sunlight: O

Hardiness Zone: 4

Other Names: Scholar Tree

Description:

An elegant and refined small shade or accent tree with attractive compound leaves, showy panicles of white flowers in spring and a symmetrical rounded habit, an ideal size for home landscapes; adaptable to soil types

Ornamental Features

Millstone Japanese Pagoda Tree is bathed in stunning panicles of lightly-scented creamy white bell-shaped flowers at the ends of the branches from late spring to early summer. It has dark green deciduous foliage. The pinnately compound leaves turn yellow in fall.

Landscape Attributes

Millstone Japanese Pagoda Tree is a deciduous tree with a more or less rounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This tree will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Messy

Millstone Japanese Pagoda Tree is recommended for the following landscape applications;

- Accent
- Shade

Planting & Growing

Millstone Japanese Pagoda Tree will grow to be about 45 feet tall at maturity, with a spread of 35 feet. It has a high canopy with a typical clearance of 5 feet from the ground, and should not be planted underneath power lines. It grows at a fast rate, and under ideal conditions can be expected to live for 70 years or more.

This tree should only be grown in full sunlight. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
